Do You Know the Differences Between IFEEDER and AFIA?

By: Lara Moody, IFEEDER executive director

Survey data from the American Feed Industry Association indicates that not everyone understands the differences between the AFIA and the Institute for Feed Education and Research. That’s understandable because, as partners who both support the animal feed industry, we work together very closely. Let’s look at the differences:

501(c)(6) Trade Association with a mission to be the voice of the U.S. animal food industry, influencing policy and connecting people.

Core Functions:
- Represents industry before regulators and policymakers, advocating for policy positions
- Serves as the industry’s voice
- Offers confidential expertise
- Provides engagement opportunities for specialized training, professional education and networking

Revenue Sources:
- Membership dues
- Paid education and networking events
- Certification programs

501(c)(3) Public Charity with a mission to advance understanding and trust in sustainable animal feed and pet food supply chain through timely research and education.

Core Functions:
- Serves as a respected resource for industry members, allied organizations and stakeholders
- Directly funds research that informs a sustainable animal feed and pet food industry
- Cultivates relationships beyond the animal food industry to broaden IFEEDER’s funding base and support of industry research and education initiatives

Revenue Sources:
- Corporate and personal donations
- Awarded grants
As many AFIA staff support IFEEDER’s work, we recognize there can be confusion on the distinct roles and responsibilities of the two organizations. *Reach out to me* with any questions.

---

**Fundraising Needs:**
**Can You Help Us Help the Industry?**

Several projects are underway to support the animal food industry. Some are funded with grants and others through corporate and personal donations.

Can you help us wrap up fundraising for two projects?

- Updating the Nutrient Requirements for Swine report is 56% funded with **$33,000 left to raise**.

- Advancing Phase 2 Sustainability efforts is 84% funded with **$45,000 left to raise**.

*Contact me* if you’re interested.

---

**Feed’s Role in Sustainable Beef**

*Making livestock feed production more sustainable will require high levels of cross-industry collaboration.*
In general, reducing the environmental footprint of beef production through feed falls into one of two categories: crop production on the farm or ration innovation. The question is, how can we marry the two in a way that makes sense for both the feed and beef industries?

In 2022, the U.S. Roundtable for Sustainable Beef (USRSB) announced industry goals and sector targets linked to air and greenhouse gas (GHG) emissions, land resources, water resources, employee safety and well-being, animal health and well-being, and efficiency and yield. Of the six goals, the USRSB feed sustainability task force identified four areas specific to feed including their linkage to crop production on the farm or ration innovation (Table 1).

Where You’ll Find IFEEDER Next

Looking for someone to speak to your team about IFEEDER’s work around industry sustainability, research or education? Contact Lara Moody.

Find IFEEDER at these upcoming events:

- Sept. 20-21: Minnesota Nutrition Conference - Mankato, Minn.
- Oct. 18: Iowa State University Colloquium Course on Sustainable Agricultural – Ames, Iowa
- Oct. 31 - Nov. 2: Pet Food Association Canada Conference - Banff, Alberta, Canada
- Nov. 7-9: Distillers Grains and Product Diversification Summit at
Donate Now!

For every $1 IFEEDER invests in research and education projects, $5 is leveraged from other sources. All donations go directly toward projects, as IFEEDER's administrative costs are borne by American Feed Industry Association, so your donations go even further. Help us maximize our reach by donating today! Click the link below to make a gift. For questions, contact Lara Moody, IFEEDER executive director.
